## Room controller and Ethernet bridge in one compact device

- **Single box solution** – Compact design allows for small installation footprint and reduced cabling for a simpler and faster installation.
- **Inbuilt Ethernet port** – Directly connecting to a site's Ethernet LAN, the device can securely report its status and pass network messages via the Dynalite PDDEG-S\*.
- **Pre-programmed** – Can be preloaded with a bespoke configuration to immediately meet the project's needs from the moment it powers up.
- **Powerful processor** – The internal processor allows the device to perform advanced scripted functions and provide automated intelligent responses to multiple inputs.
- **Mixture of switching relays** – Supports a combination of different relay ratings and types for a perfect blend of performance and cost-effectiveness.
- **18 dry contact inputs** – Allows simple integration with third-party devices and systems.
- **64 channel DMX output** – Adds color and dimming control for a touch of theatrics.
- **UL924 Input** – Integrates seamlessly with compatible emergency systems.
- **Four 12 V digital outputs** – Designed to drive room status indicator LEDs in common cathode configuration, and trigger additional devices such as doorbells.
- **300 mA DyNet output** – Directly support the requirements of DyNet devices without the need for an additional network power supply.
- **Unique LAN addressing** – Two banks of DIP switches allow the installer to manually set the device's network identification.

\* Each PDDEG-S supports encrypted communication with up to 25 controllers.
